PHIFER
MOSQUITO SCREENS

PHIFER
MOSQUITO SCREENS

PHIFER INCORPORATED, the world's largest producer of Aluminium and Fiberglass insect screening solutions was established in the year 1952 in Tuscaloosa, Alabama, USA.

Originated as a weaver of aluminium insect screening, PHIFER has come a long way evolving itself as a prominent leader in the realm of manufacturing and global distribution of insect screen, solar control fabrics, drawn wire, engineered products, and designed fabrics.

The remarkable success achieved by PHIFER is undoubtedly a result of its steadfast adherence to Mr. Phifer's philosophy of providing utmost satisfaction to customers without ever compromising on the impeccable QUALITY of its Products, always Delivering on Time, and at the Right Price.

Unparalleled with more than 70 years of towering expertise, Phifer has continuously strived to develop cutting-edge insect screening products for windows and doors that are not only efficient, functional, and durable but also add to the ambience aesthetically.

The Phifer screens are meticulously designed to emphasize a clearer view, "High Definition" - type outward view while offering potent and proven protection from annoying, aggravating, and often deadly disease-carrying insects and pests.

PHIFER is in a relentlessly thriving mode to continuously enhance and innovate its products periodically. Phifer is in its pursuit to keep abreast of the latest technological innovations and design trends reflecting diversity, international versatility, and rendering undying commitment to assure unsurpassed customer service.

VISION

"To Excel in Everything, We Do"

Phifer's commitment to Quality Excellence, Safety Excellence, and Service Excellence give it many opportunities to excel in its every undertaking.

MISSION

"To Serve Customers"

Serving Customers has been and will always be Phifer's infinite goal and is the basis of the quality policy that Mr. Phifer had set into motion back in 1952.

Technology, communication and information sharing have progressed in leaps and bounds enabling Phifer with even more capabilities and cutting-edge means to help serve its valued customers with utmost efficiency and effectiveness.

MOTTO

"Do Unto Others As We Would Have Them Do Unto Us"

PHIFER's MOTTO, The Golden Rule, helps it on the pathway to its ultimate goal - Excellence. Treating one another with respect and compassion is imperative for the success of Phifer's Employees, Customers, Suppliers, and Community collectively.

THE GOLDEN RULE

BetterVue®
BY PHIFER

It is Phifer's first fiberglass improved visibility insect screen (iVis). BetterVue improved insect screening is engineered to impart a sharp view without compromising on strength and durability in the process. This innovative screen enhances your view by making it sharper and more brilliant.

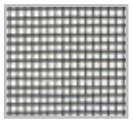
FEATURES

- Advanced airflow technology, allows natural light and fresh breeze to flow through
- Exceptional optical clarity for a sharp and enhanced brilliant outward view
- Smaller holes provides maximum insects protection
- Promotes improved light transmission in low-E glass window offering a brighter view
- Phifer's Watershed technology keeps the screen clear of water for maximum viewing clarity
- Suitable for all types of window/door screen and patio screen door applications

SPECIFICATION

Material : Fiberglass
Fills & Warps : 18 x 18 per sq. inch
Thickness of Screen 0.008 inch

Colour Options



Black

EliteScreen®
BY PHIFER

PHIFER MOSQUITO SCREENS

Elite® is Phifer's improved visibility insect screening engineered. EliteScreen®'s stiff finish makes it ideal for roller and retractable screen systems. With a specially engineered coating, specially developed for retractable screen systems, Elite® is thinner than standard insect screening, and its finer screen facilitates improved insect protection and airflow.

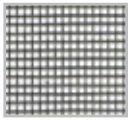
FEATURES

- Best used for roll-up screens and retractable windows or balconies
- Formulated for maximum welding efficiency, its reduced thickness also makes it an excellent choice for screens with longer drops
- Economical and offers year-round comfort, good health, and peace of mind

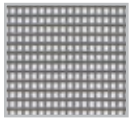
SPECIFICATION

Material : Fiberglass
Fills & Warps : 18 x 16 per sq. inch
Thickness of Screen 0.009 inch

Colour Options



Charcoal



Silver Grey

Solar Screen®
BY PHIFER

Protecting everyone at home and offices from the sun's heat radiations while providing an enjoyable experience of the glass windows. It concurrently allows users to save energy with solar screen technology. Phifer's Solar Screen sunscreen efficaciously reduces up to 65% of the sun's heat and glare before it enters through the windows into homes and offices.

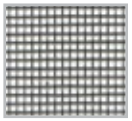
FEATURES

- It plays a dual role such as mosquito screens as well as sun radiation control
- Protects against fading and sun rot
- Provides daytime privacy
- The screen lets in soft light and breeze
- Shields from glare
- Good outward visibility

SPECIFICATION

Material : Fiberglass
Fills & Warps : 20 x 30 per sq. inch
Thickness of Screen 0.008 inch

Colour Options



Black

Aluminium Insect Screen®
BY PHIFER

The Aluminium Insect Screen offers the best outward visibility. Produced with Phifer's electrodeposition paint system, the aluminium screen has a premium coating that is durable and has excellent weathering characteristics.

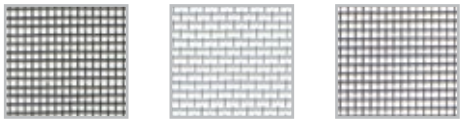
FEATURES

- Offers the best outward visibility
- Reduced glare due to dark color
- High durability
- Excellent weathering characteristics
- Excellent suitability for window, door and porch applications

SPECIFICATION

Material : High Grade 5154 Alloy with electrode deposit coating
Fills & Warps : 18 x 17 per sq. inch
Thickness of Screen 0.009 inch

Colour Options



Black Brite Charcoal

SeeVue Stainless Steel®
BY PHIFER

PHIFER MOSQUITO SCREENS

SeeVue is woven from stainless steel, which not only improves visibility with its fine wire diameter but also makes this product much stronger than standard insect screens. It allows superior airflow and meets the high standard of insect protection.

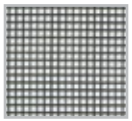
FEATURES

- Provides outstanding durability
- Protects from harmful insects and pests
- The black finish offers improved visibility, enhances life span and prevents corrosion
- Allows superior airflow
- Easy to clean
- Excellent suitability for porch applications and is safe for use with pressure-treated lumber

SPECIFICATION

Material : 304 Grade Steel coated with black powder
Fills & Warps : 18 x 18 per sq. inch
Thickness of Screen 0.006 inch

Colour Options



Black

ssVue Stainless Steel®
BY PHIFER

Similar to SeeVue but differs in increased thickness of wire diameter and the screen is tougher and sturdier in touch and feel. The woven stainless steel makes the ssVue screen sharper and more brilliant.

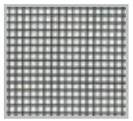
FEATURES

- Offers excellent outward visibility
- Excellent suitability for window, door and porch applications
- Economical option

SPECIFICATION

Material : 304 Grade Steel coated with Epoxy black powder
Fills & Warps : 18 x 17 per sq. inch
Thickness of Screen 0.007 inch

Colour Options



Black

Bronze Screen®
BY PHIFER

PHIFER MOSQUITO SCREENS

Bronze Screen is not only an effective way to control insects but can also revive the elegant charm and nostalgia of past years. In its original brand-new state, Phifer Bronze Screen is a bright Copper colour, but weathers to a beautiful dark bronze finish over time.

FEATURES

- Brings back the nostalgic look of vintage homes
- Ideal solutions for high-end applications and architectural accents
- A unique alternative to aluminium and fiberglass screening
- Provides high strength and durability
- Excellent suitability for windows, doors and porches
- Predominantly used in antique houses and coastal regions
- The dark glittering effect is an added advantage to weathering in the long term

SPECIFICATION

Material : Bronze (90% Copper & 10% Zinc)
Fills & Warps : 17 x 15 per sq. inch
Thickness of Screen 0.010 inch

Colour Options

Bronze

PetScreen®
BY PHIFER

Primarily designed for domestic pets, the Phifer PetScreen is tear and puncture-resistant against damages inflicted by dogs and cats. The PetScreen is seven times stronger than standard screens. The polyvinyl coating gives added extra strength to the screen.

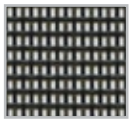
FEATURES

- Resists damage subjected by dogs and cats
- Easy installation
- Heavy duty and ultra-durable screen
- Excellent suitability for doors and porches

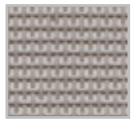
SPECIFICATION

Material : Vinyl-coated polyester
Fills & Warps : 17 x 10 per sq. inch
Thickness of Screen 0.036 inch

Colour Options



Black



Silver Grey

TuffScreen®
BY PHIFER

PHIFER
MOSQUITO SCREENS

Three times stronger than regular screen screens, Phifer's TuffScreen is a high-quality vinyl-coated polyester screen. TuffScreen is an excellent choice for a retractable window, where its exceptional durability has the capability to easily withstand the rough and tough use multiple times over a long period of time.

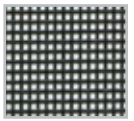
FEATURES

- Heavy-duty, vinyl-coated polyester insect screen
- Ideal for use in high-traffic areas
- Durable - resists damage from punctures
- An excellent choice for patios, porch enclosures, retractable systems, windows and doors

SPECIFICATION

Material : Vinyl-coated polyester
Fills & Warps : 17 x 14 per sq. inch
Thickness of Screen 0.025 inch

Colour Options



Black

PHIFER
MOSQUITO SCREENS

VELCRO FIT
BY PHIFER

Velcro Fit is the most commonly prevalent type of mosquito screen fitment system. This is the most economical option available for traditional windows with a wooden frame. Stitched by two-needle machines where the threads are in a straight-line. This fitment can be used with a quality hook and loop.

SPECIFICATION

Recommended Size	:	Maximum - (6 ft. x 6 ft.)
Screen Type	:	All fiberglass type and polyester screen can be used
Hook & Loop Option	:	Black and White. (Sticker also available)
Fixing Surface	:	Wooden surface (direct installation), used with Box Frames for walls, uPVC and aluminium frame windows. If there is no wood, then adhesive Velcro hook with loop size - 1 inch or ¾ inch can be used

MAGNET FIT
BY PHIFER

The Magnet Fit insect screen is designed to provide an aesthetic finish to the windows. The screen adheres to the windows and doors with the help of the PVC strips that uses ‘H’ magnet and ‘I’ magnets for a snug and steadfast fit.

SPECIFICATION

Recommended Size	:	Maximum - (3 ft. x 4 ft.)
Screen Type	:	Only fiberglass screen can be used
PVC Frame Options	:	White and Brown
Fixing Surface	:	Wooden surface (direct installation), used with Box Frames for walls, uPVC and aluminium frame windows

CLASSIC WINDOW FIT
BY PHIFER

PHIFER
MOSQUITO SCREENS

CLASSIC WINDOW OPENABLE FIT

Phifer's Classic Window Openable Fit offers ease and flexibility in removing the frames and remounting it back on windows. The fitment is made of a high-grade aluminium frame of 2cm breadth. This fitment is perfect to keep you protected from mosquitoes without affecting the aesthetics of your home. This has HDPE (high-density polyethylene) hinges, stoppers and handle.

SPECIFICATION

Recommended Size	:	Maximum - (2 ft. x 6 ft.)
Screen Type	:	7 types of screen can be used
Frame Colour Options	:	White, Ivory, Honey Gold, Dark Brown
Fixing Surface	:	Wooden surface (direct installation), use Box Frames for walls, uPVC and aluminium frame windows

CLASSIC WINDOW FIXED FIT

Phifer Classic Window Fixed Fit is best suited where there is a lack of space and no requirement for the window to be opened. The fitment contains aluminium frames and is mounted with HDPE (high-density polyethylene) stoppers on the four sides.

SPECIFICATION

Recommended Size	:	Maximum - (2.5 ft. x 6 ft.)
Screen Type	:	7 types of screen can be used
Frame Colour Options	:	White, Ivory, Honey Gold, Dark Brown
Fixing Surface	:	Wooden surface (direct installation), use Box Frames for walls, uPVC and aluminium frame windows

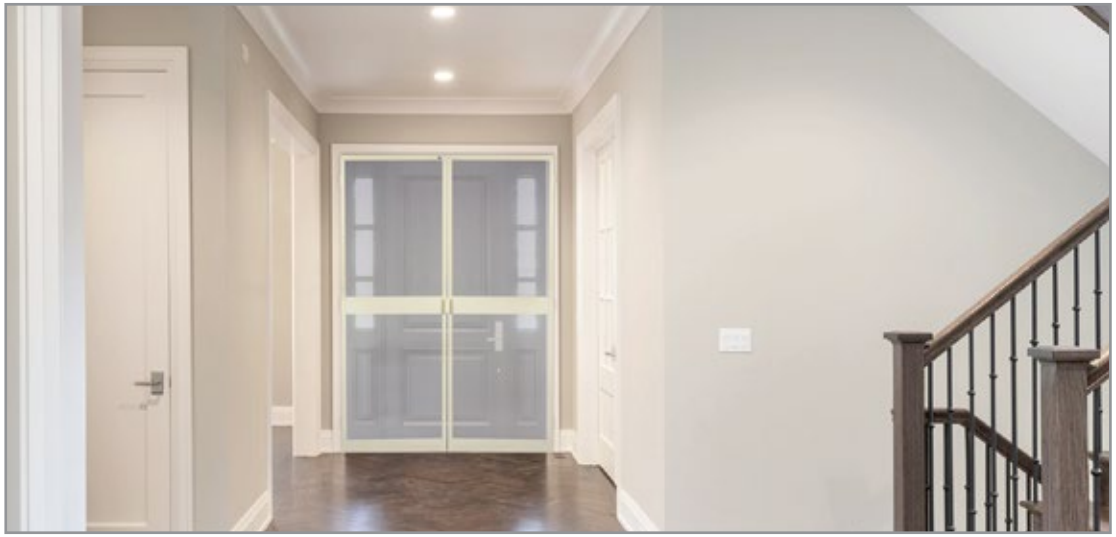
ACE DOOR FIT
BY PHIFER



Ace Door Fit is a premium door fitment and is aesthetically well built with simplicity and functionality. It has two grooves, one for screen and the other for magnet strip and weather strip. As an added feature the door is provided with a 5" thick middle plate and kick plate to prevent the screen from coming loose from the fitment when pushed. All accessories are made of graded high-quality aluminium.

SPECIFICATION

Recommended Size	:	Maximum - (3.5 ft. x 8 ft.)
Screen Type	:	A combination of various types of screen can be used
Frame Colour Options	:	White, Ivory, Honey Gold, Dark Brown
Fixing Surface	:	Wooden surface (direct installation), use Box Frames for walls, uPVC and aluminium frame windows

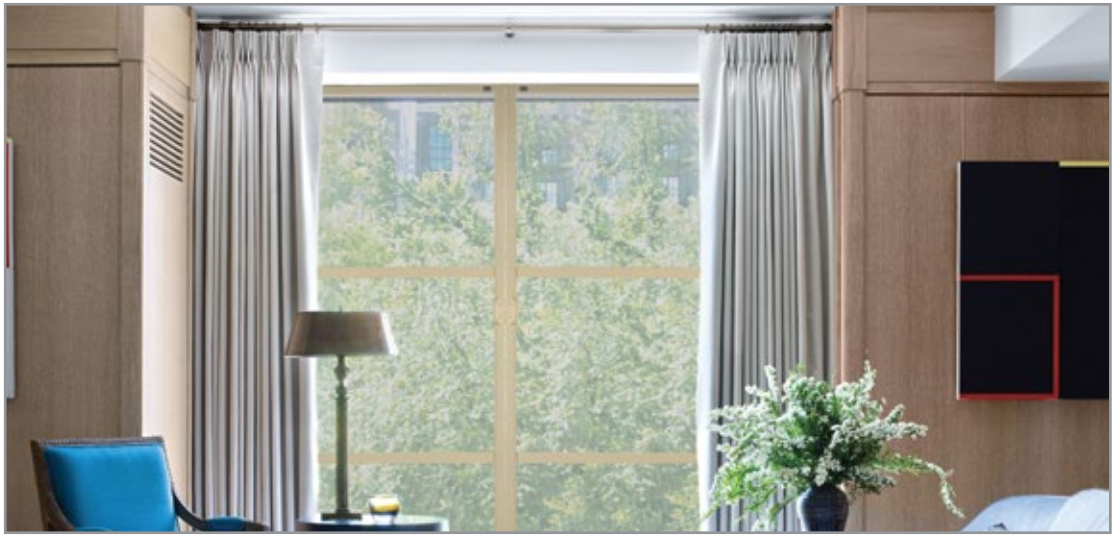
CLASSIC DOOR FIT
BY PHIFER



Classic Door Fit is a standard type of door fitment without a middle plate and kick plate. Economical and budget-friendly, the Classic Door fit has slim and sleek magnet catchers. It is a simple device that has two grooves one for the screen and another for weather strip, which makes it an ideal choice to be used as a solution for wall crease and gaps. This fitment offers effective protection from mosquitoes without taking away the aesthetics of your home.

SPECIFICATION

Recommended Size	:	Maximum - (3.5 ft. x 8 ft.)
Screen Type	:	A combination of various types of screen can be used
Frame Colour Options	:	White, Ivory, Honey Gold, Dark Brown
Fixing Surface	:	Wooden surface (direct installation), used with Box Frames for walls, uPVC and aluminium frame windows

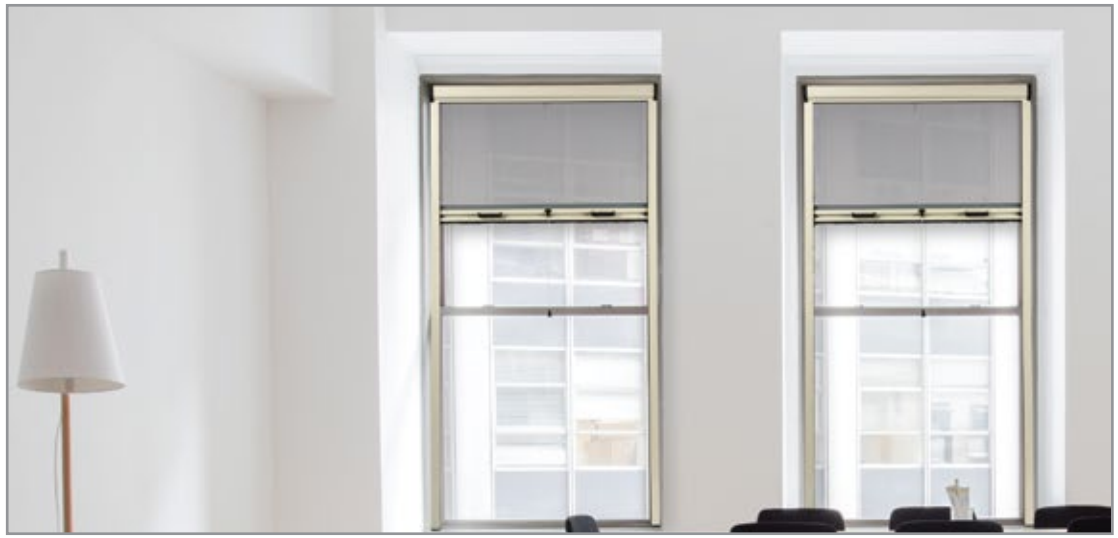
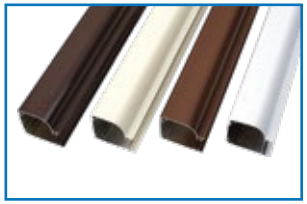
GLOSSY ROLL FIT
BY PHIFER



Phifer's most stylish and innovative product fitment. Glossy Roll Fit smoothly rolls up and disappears into an aluminium section when opened and could be pulled down with ease and locked at the bottom whenever mosquito protection is required. This system employs the braking technology that helps the screen roll up and down at a slow pace when retracted and opened. As an additional feature, it also employs a self-cleaning mechanism that cleans the screen and the rollers every time the screen is rolled up and down. This prevents dust and debris from collecting and interfering with its functionality.

SPECIFICATION

Recommended Size	:	Maximum - (5 ft. x 5 ft.)
Screen Type	:	Elite fiberglass
Frame Colour Options	:	White, Ivory, Honey Gold, Dark Brown
Fixing Surface	:	Can be fixed directly on the wall, it has two types of installation such as inner fitting in the wall surface and outer fitting on the wall surface



Frame Colour Options

Accessories

Roll Fit

Note: Not recommendable for higher than 2nd-floor installations or windy areas

PHIFER
MOSQUITO SCREENS

GLIDE FIT
BY PHIFER

Glide Fit is one of Phifer's strongest heavy-duty fitments. The robust strength of Glide Fit can withstand high wind pressure. This variant is an excellent choice for a sliding system and is best suited for balconies and French windows. The employment of heavy aluminium sections in the frame offers structural rigidity that could go up to as much as 10' x 10' size openings without any supporting cross-sections in the middle. The shutter can be removed for cleaning and is very easy to operate and maintain.

SPECIFICATION

Recommended Size	:	Maximum - (10 ft. x 10 ft.)
Screen Type	:	A combination of 9 types of screen can be used
Frame Colour Options	:	White, Ivory, Honey Gold, Dark Brown
Fixing Surface	:	Can be fixed directly on the wall
