Roller

Shades

THE INDUSTRY DESIGN STANDARD FOR ROLLER SHADES

Introduction

Simple, classic and elegant, **Hunter Douglas Roller Shades** offer a clean, contemporary look at the window. Finding the perfect shade for your home or office is easy with wide range of fabric, color and texture combinations at your fingertips.

HunterDouglas

Light Control

With our extensive selection of light-filtering and room-darkening fabrics, Roller Shades let you achieve just the right level of light in the room. The more sheer the fabric, the more light it lets in from the outside, on the other hand, blackout roller shades block out nearly all the light and provide the most privacy.

UV Protection and Energy Efficiency

Even on cloudy days, UV rays can do serious damage to your floors and furnishings. Roller Shades will provide UV protection and energy efficiency while also maintaining your views to the outside.

EOS® 500 Roller system

The EOS®500 system brings together the best of decades of experience. The key feature of the RB®500 roller shade system is its versatility, with components to support motorized and chain mechanisms. Designed for commercial applications, this modular system allows installation in a wide range of shade sizes and position.

Key features

- Highly durable, modular system offering a wide variety of components to build a custom roller blind tailored to the project's requirements.
- Universal spring-loaded end plug mounts provide for smooth and easy installation.
- Counter balance weight system provides for ease of lifting roller shades over large expanses.
- Modular operating system accommodates chain and motorized control.
- Easy to connect multiple roller blinds side by side.

Operating Systems

Chain Operation

For ease and precision, opt for the clutch-operated continuous chain loop that works on the principle of a pulley, rotating a clutch to raise or lower the shade.

Motorized Operation

Roller shades are offered with remote and switch motors. This enables integration with automation platforms.

PowerView® Automation lets you schedule your Roller Shades to open and close on their own, any time of the day with the touch of a button, a tap on a mobile device or the sound of your voice. So forgo the alarm clock, and use light as a wake-up call instead.
