Duette®

Honeycomb Shades

The original cellular shades, engineered to provide beauty and energy efficiency at the window in both cold and warm climates.

HunterDouglas

Introduction

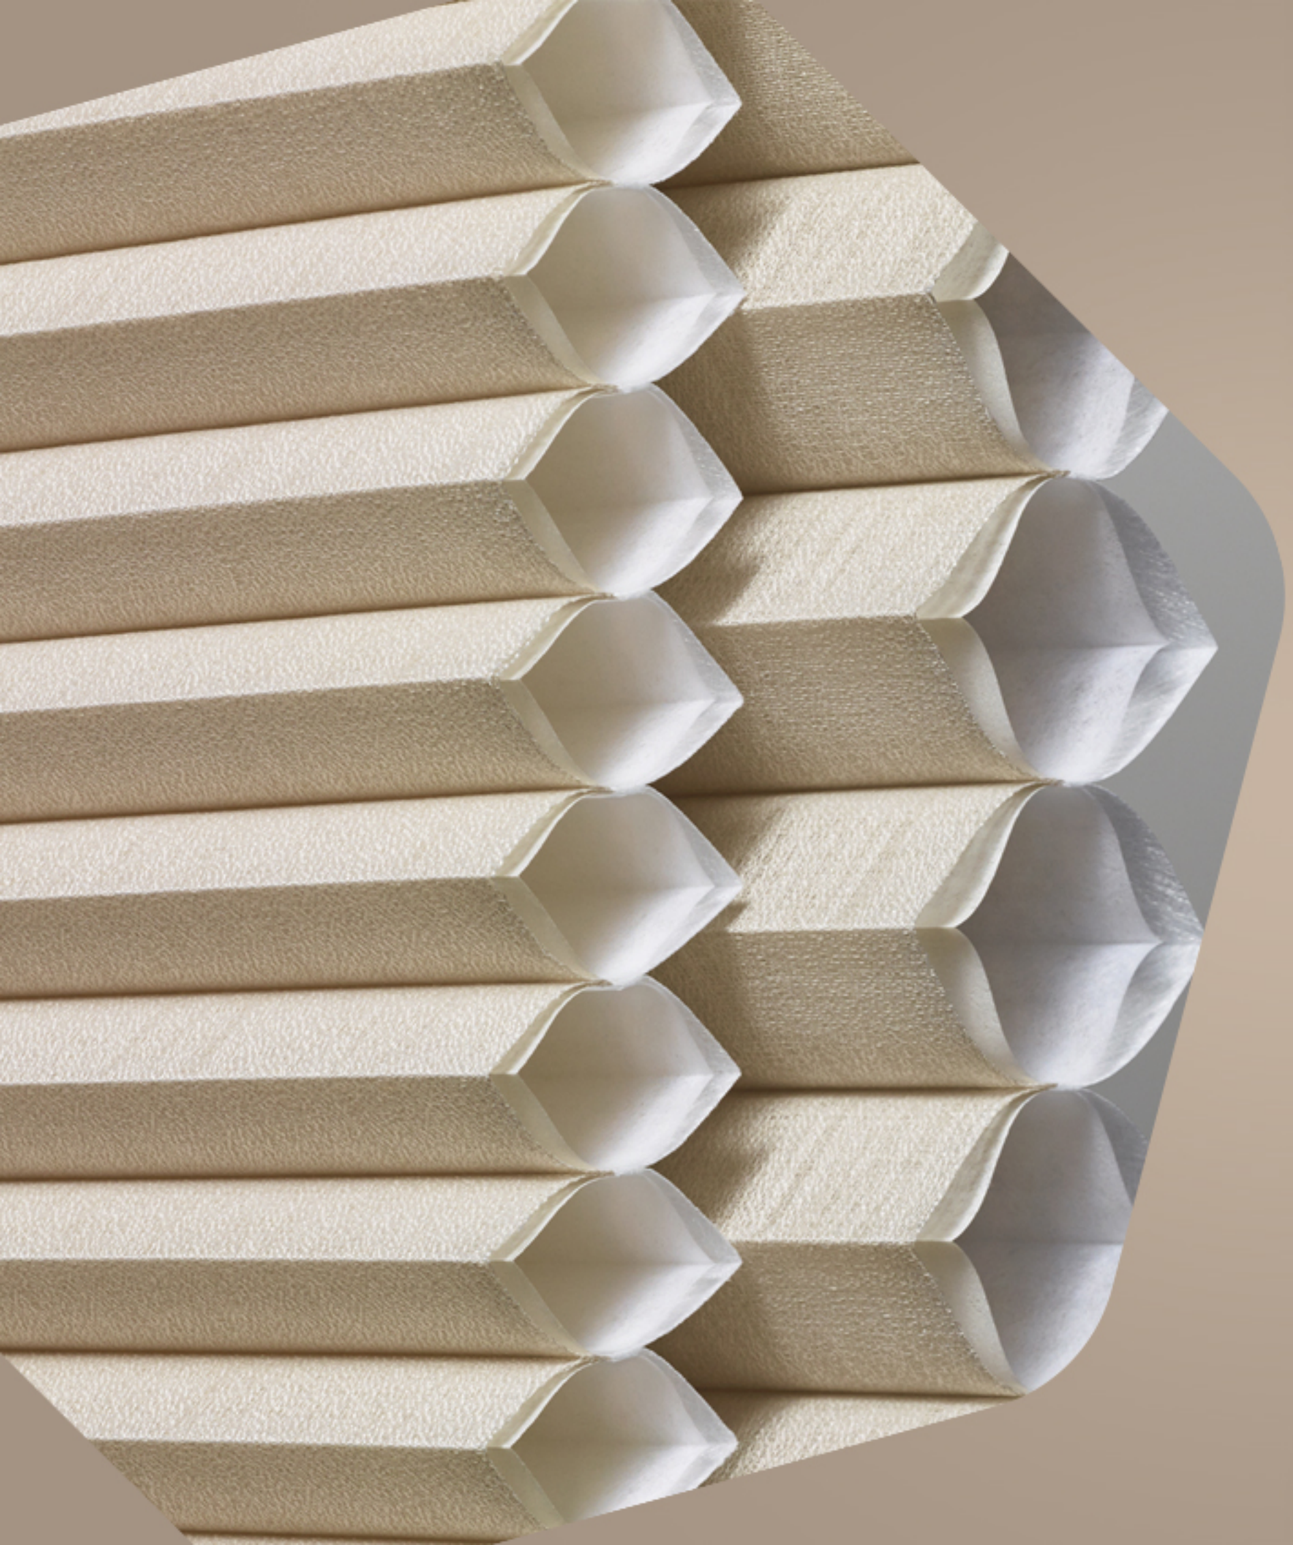

The magic of cellular honeycomb shades is in their specially engineered honeycomb shape, a unique construction that traps air and creates a layer of insulation between the window and a room's inside temperature. These shades help in keeping your home warmer in winter and cooler in summer by offering superior energy efficiency.

HunterDouglas

Engineered for Energy Efficiency

Their specially engineered honeycomb construction traps air in distinct pockets, which creates insulation that can help lower your energy consumption and be cost-efficient.

HunterDouglas

Unique Honeycomb Structure

SUMMER BENEFIT

Reduce unwanted heat through windows by up to

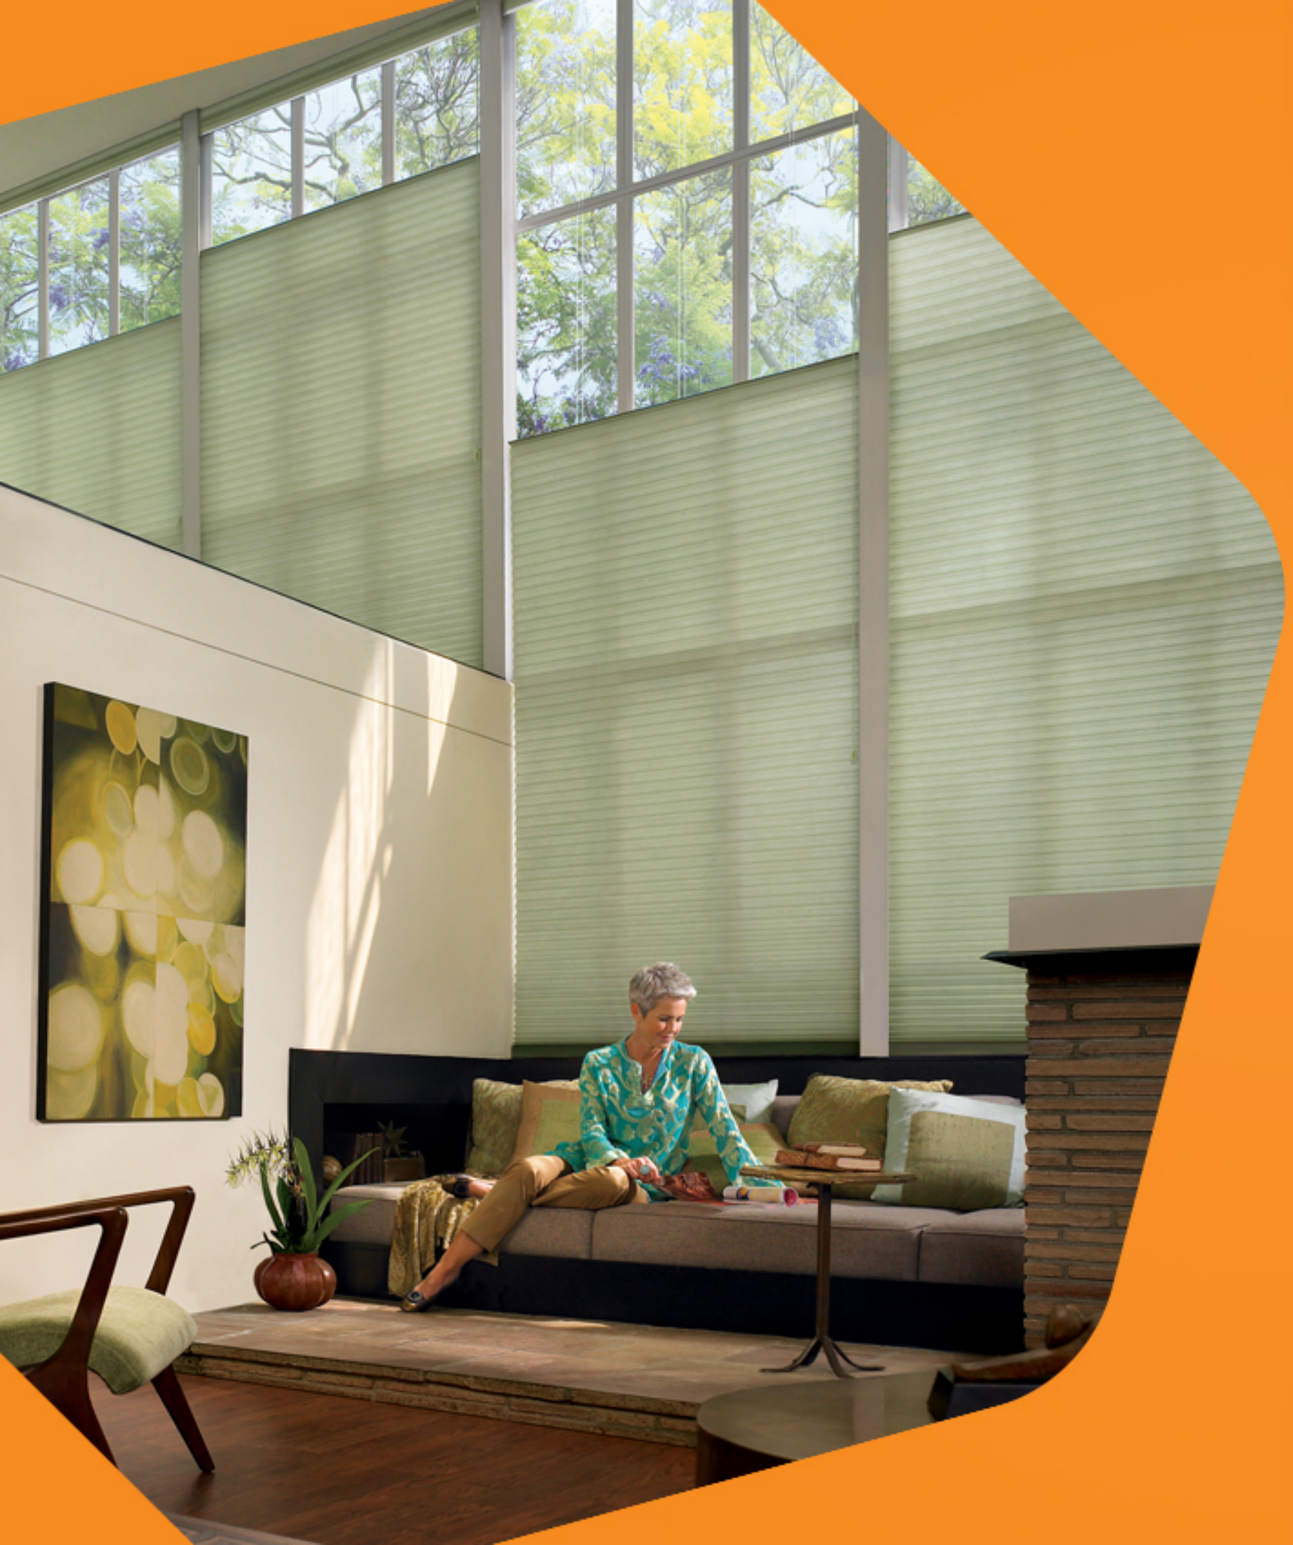

80%

WINTER BENEFIT

Reduce heat loss through windows by up to

40%

HunterDouglas

Infinite adjustability with Top-Down/Bottom-up

Unlike traditional shades that only open from the bottom up, the Top-Down/Bottom-Up design option lets you control the exact position of your shades to fit your ideal level of privacy, light control and comfort.

HunterDouglas

For a smart living

PowerView® Automation lets you schedule your Duette® Honeycomb Shades to open-and-close on their own—at any time of the day—with the touch of a button, a tap on a mobile device or the sound of your voice. So forgo the alarm clock and use light as a wake-up call instead.

HunterDouglas

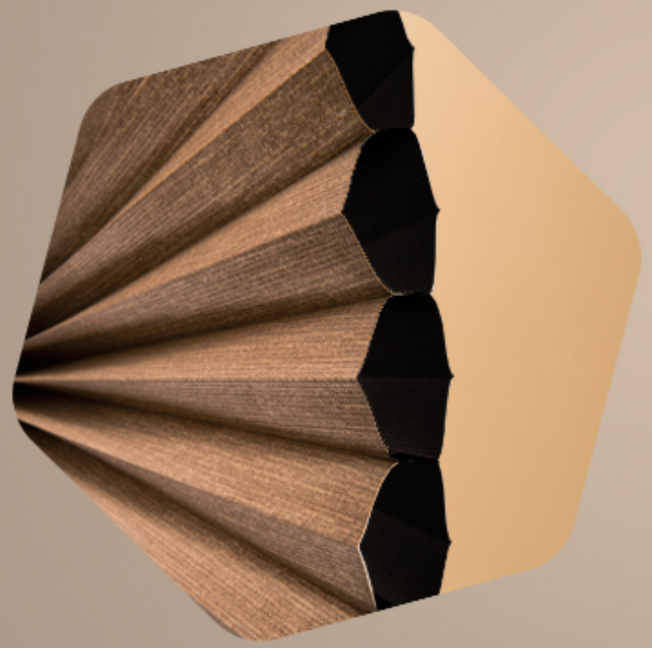

Voice control

Operating your PowerView® shades just got even easier. Use Siri® on your iPhone®, iPad® or HomePod™ to operate individual shades or Scenes hands-free. Voice-activate your Scenes using Google Assistant.

HunterDouglas

Duette® Honeycomb Shades

Duette® Honeycomb Shades are available in two construction architectures

Single Honeycomb

Architella
